Job Title: Architectural Intern / Registered Architect
Experience: Minimum 2-5 Years within a Canadian professional environment
Duration: Permanent / Full-Time
Location: Winnipeg MB / In-person Work
Salary: Compensation shall be determined as based on skills & experience

About

AtLRG Architecture Inc is a growing design office located in Winnipeg Manitoba, with ongoing projects in Manitoba, Alberta, and British Columbia. Our work is primarily focused on private development work in multi-family and commercial projects, new builds and retrofits, including heritage and office to residential conversions. AtLRG brings a rational, minimalist approach to our design process, rooted in a desire to achieve more with less. We view constraints as opportunities for boldness and excitement.

AtLRG Architecture Inc is seeking motivated, talented, and self-disciplined individuals with 2–5 years of professional experience. We offer full-time, permanent positions within our dynamic and collaborative studio environment. We offer the right candidate(s) an excellent opportunity to grow professionally within our practice, with competitive compensation matching the successful candidate's skills and experience level.

ATLRG prides itself on fostering an open, inclusive, and relaxed workplace culture. In return, the expectation is that all staff are also actively engaged, rigorous, and focussed on their work for the time of regular office hours. ATLRG's productivity and long-term success depend on every team member using their time effectively and maintaining a high standard of professionalism.

Role & Responsibilities

While working within a team structure the candidate will actively participate in the entirety of the architectural design process, with an opportunity to engage a variety of scales and typologies of projects. The successful candidate will also assist in product & material research and selection, costing exercises, code and zoning analysis, development permit submissions, project coordination, as well as communication with consultants, authorities and clients.

Qualifications

The ideal candidate has a minimum of 2 years professional experience, and working knowledge of the Manitoba & National Building Codes. They are curious, studious, resourceful, collaborative, self-motivated, and organized.

They would also be proficient & knowledgeable in the following areas:

- Common, Canadian construction systems and construction methods.
- Experience in CAD drafting, with the ability to proficiently and independently produce & coordinate IFC drawing sets and manage permit applications.
- A familiarity with Building Information Modelling, team & cloud file collaboration would be an asset on the Vectorworks platform.
- Other software applications include Pages & Numbers, Adobe CS, Rhino / Sketchup, & Vray.
- Hand sketching, and strong, digital, graphic communication skills.
- Written, clear, concise, communication skills is a must, experience in proposal writing would be an additional asset.
- Familiarity with physical modelling, & 3D printing fabrication processes would also be a plus.

We thank all those who apply in advance – only qualified candidates interested in pursuing a full-time career in the architecture profession will be considered for a position – all inquiries shall be kept confidential.

To apply, submit PDF curriculum vitae and portfolio digital or in person –
