

We are looking for a creative and dedicated person to join our team!

Having an over-reaching purpose helps guide our practice. Our goal is to produce socially conscious architecture: spaces that inspire, heal, and nurture those who inhabit them. Being responsible patrons of this earth is a duty each member of our team embodies. Our purpose is to design spaces that will be celebrated by their occupants. Spaces that promote innovation, foster community, give space for people to become the best person they can: this is what fuels our purpose and passion for what we do.

While we are a small (pico) company, our team members have lived in all areas of the world: from a small farm in Saskatchewan, to Japan, Montreal, Ghana, British Columbia, Trinidad, and of course, our home of Winnipeg.

We have designed buildings at all scales: from community-oriented renovations of a few hundred square metres, to projects with budgets in the millions. We believe in the cultivation of wholistic architects. Each team member is trained to work on all aspects of building, from design through construction administration.

We are looking for an architectural intern or registered architect with a minimum of two years experience. If you are interested in a position at this dynamic firm, please submit your resume in confidence to [gail@picoarchitecture.com](mailto:gail@picoarchitecture.com). We thank all applicants for their interest, however only those selected for an interview will be contacted.
