Senior Architect – Health Care/Long Term Care

We are seeking a hands-on Senior Architect, with ambitions to re-shape the direction of health care and LTC design. A passion for elder care, reforming long-term care for seniors and the household model is of tremendous interest to us.

If you are a registered architect, have 10 years of relevant experience working with key stakeholders on multiple long-term care projects, demonstrate your contributions to the ongoing services of project programming, planning and design development of complex, operationally current, patient/resident focused spaces, then we'd love to hear from you.

You will lead a team of talented professionals and ensure ft3 projects continue to provide value thru practical and cost effective solutions for user engaged clients while demonstrating a high level of design sensitivity.

Experience with Revit, Lean and LEED AP are considered to be a plus

Compensation is based on experience and ft3 offers a pension matching program, a great work environment, and a comprehensive health and dental package. To apply, please send your cover letter, resume and an abbreviated portfolio (if available) to Marten Duhoux duhoux@ft3.ca. We thank all applicants for their interest, however, only those selected for an interview will be contacted.
